## PROFILE

---

I am an analytical and results-driven software engineer with experience in designing, building, and maintaining scalable backend systems. Experienced in programming languages and frameworks, including Python, Javascript, Java, React, Spring Boot. Skilled in creating clean, efficient code and passionate about developing scalable systems. Committed to delivering high-quality software solutions, collaborating with cross-functional teams, and continuously learning to solve complex problems.

## PROFESSIONAL EXPERIENCE

---

01/2025 – Present  
Lagos, Nigeria

**Software Developer intern**  
*Semicolon*

- Work closely with backend engineers to understand system requirements, business logic, and server-side architecture in a real-world Java development environment.
- Learn to write, test, and debug backend code using Core Java, following object-oriented principles and clean code practices.
- Assist in implementing small modules such as service methods, data models, or input validation, with guidance from mentors.
- Observe and gradually participate in code reviews to understand backend standards, performance considerations, and maintainability.
- Get introduced to frameworks and tools commonly used in backend Java development (e.g., Spring Boot, Maven, JUnit), and practice through guided tasks.
- Practice using Git for version control and work in IntelliJ IDEA or other IDEs to become familiar with professional Java tooling.

## EDUCATION

---

Lagos, Nigeria

**Software Engineering**  
*Semicolon*

2015 – 2021

**B.Eng. Computer Engineering**  
*Bayero University, Kano*

## SKILLS

---

### Programming Languages:

Java, Javascript, Python, SQL, Version control(Git, Github)

### Soft Skills

Problem solving, excellent organization, leadership, attention to detail, continuous learning and growth mindset, self-starter.

### Methodologies:

OOP, RESTful, APIs, Agile, CI/CID

### Frameworks & Tools:

Spring Boot, React, Git, Draw.io  
Kubernetes

### Testing

JUnit, Mockito

## PROJECTS

---

### Shop Well

*An e-commerce RESTful web-service that provides a wide range of features for product management, secure payment options, order tracking, and customer support. Technologies: Core Java, SQL Server, Spring Boot.*
